

COMPREHENSIVE ECONOMIC AND TRADE AGREEMENT

The Benefits of CETA for PFS Customers in Europe

Tariff Elimination:

On the day that CETA entered into force, 98 percent of EU tariff lines became duty-free for Canadian goods, and an additional one percent will be eliminated over a seven-year period.

Cutting Through Red Tape:

Wherever possible, customs procedures will be simple, effective, clear and predictable so as to reduce processing times at the border and make the movement of goods cheaper, faster and more efficient.

Product Certifications

Primary Fluid Systems' products conform to **Pressure Equipment Directive (PED) 97/23/EC**. Many of our products and materials have attained certification to the **NSF/ANSI-61** standard.

What is CETA?

The Comprehensive Economic and Trade Agreement (CETA) is a free trade agreement between Canada and the European Union, covering virtually all sectors and aspects of Canada-EU trade.

Reducing Trade Barriers:

CETA will allow Canadian producers to have certain products tested and certified, for EU markets. This will reduce testing and certification costs and delays for manufacturers.
